

FILM ASSIGNMENT: *Planet in Peril*

<https://www.youtube.com/watch?v=-263R3CP2c4>

FIRST... Read these questions through before watching the film. Then, answer DURING the film.

1) Name two of the three main narrators of this video presentation.	
2) How much ice is Greenland losing each year?	
3) What has happened to “create” new islands off the coast of Greenland?	
4) Over the last three decades, polar bears have been found to be under what type of “stress?”	
5) Why do polar bears need to travel farther to find their prey?	
6) What is the name of the “sinking” island chain?	
7) Climate change is sometimes still referred to as a “debate” but even Pat Michaels (climate skeptic) says humans are causing change... True or False?	
8) One of the largest emitters of greenhouse gasses in the world is what? [Based on human exploitation]	
9) How much rainforest is lost to burning each and every year?	
10) The name for the practice of putting poor people into more danger from industrial and chemical pollution is...	

After film, turn over and answer the following BEFORE leaving the classroom today!

**LAB ASSIGNMENT: *Planet in Peril***

**Now... answer the following question in 1 – 2 paragraphs:**

**Does the evidence presented in this video cause you to rethink your personal opinion regarding global climate change? Does it reaffirm it? Or did it have little impact? Please be sure to explain how and why... as well as what your opinion is regarding the human impacts on global climate change (briefly!)**
