

Brian Cacchiotti

Pt.1 _____

Pt.2 _____

Pt.3 _____

**THIS CONTAINS A SMALL PORTION OF A TYPICAL EXAM
BUT ALL QUESTION TYPES ARE SHOWN**

Please answer all questions with the BEST answer.
Partial credit will be given when appropriate

Part 1: Definitions

Write the correct definition for each of the following terms or concepts as used in class. (4 pts each)

1) Human Geography	
5) Hydrosphere	

Match the following terms or concepts with the proper definition (2 pts each)

	6) Remote Sensing	A	The vast gaseous envelope of air that surrounds the Earth
	7) Latitude	B	Farther away things are less important
	11) Region	F	Solid or liquid water which falls from the atmosphere
	15) Precipitation	J	Earth grid lines running North-South
		K	A graphic representation of the real world
		S	Data collected without physical contact, such as from a satellite in near-earth orbit
		T	The solid portion of the earth
		U	Movement of C (CO ₂) and O ₂ throughout the environment
		V	Computerized mapping and geographic data system

Part 2: Multiple Choice

Choose the best answer for each question. Write selected letter in box provided. (4 points each)

	16) Distribution includes all of these properties except...
A	Density
B	Condition
C	Concentration
D	Pattern
E	The above are all properties of Distribution

	25) Westerlies are...
A	West Point graduates
B	Winds blowing west to east
C	California, Oregon and Washington
D	Winds blowing east to west
E	Films featuring cowboys (and sometimes aliens)

Part 3: Short Answers

Choose 2 (two) of the following questions to answer. (10 points each)

You will be expected to fully answer the questions as written using approximately 2-3 paragraphs for each answer, but do not let space expectations limit your response. You may use a diagram to help illustrate your response, but a drawing alone will earn no credit. Some questions may have multiple parts: Be sure to answer ALL of them. While spelling and grammar are important they will not be a factor in your grade unless I am unable to read or understand your response.

I suggest you read through ALL the questions before deciding which ones to answer. You may wish to outline your response before you begin to write your answer in order to better focus your thoughts.

Write the letter of the question you are answering in the space provided on the next pages.

CHOOSE 2 (two) of the FOLLOWING:

- D: Remote sensing from satellites is one way to gather data for geographers. Describe two different situations or conditions where geographers can use satellite data to assist their research and analysis.

- F: In the study of Human-Environmental Interactions often the question is asked... ***Is man a part of nature or is man apart from nature?*** Explain what this questions means in the context of our class. You may also express your personal opinion at the end of your answer.
